

BRITTEN SCHOOL
AUGUST 2022- AUGUST 2023
STUDENT SUPPORT SERVICES

In order to assure the safety and well being of everyone at Britten School, students may need to be removed from the learning environment. Students are removed when their level of distress requires individual adult attention and/or to maintain the integrity of the classroom and learning process after less intrusive interventions have been initiated and do not meet the level of need of the student. This higher level of support allows faculty to assist the student in self-regulation to regain emotional/behavioral control and to engage him/her in active problem solving.

I, _____, have viewed the Student Support Services Area which includes the areas of Sensory and Emotional/Behavioral Support during an in-person or virtual tour of Britten School. I understand the process and utilization of these areas and understand that the procedures followed at Britten School are in keeping with Public Law 91-600, Title 89 Illinois Administrative Code III, sec. 384, ISBE IAC Section 1.280 Discipline and Section 1.285 Requirements for the Use of Therapeutic Time Out and Physical Restraint. I further understand that any time my child requires these services, I will receive a copy of the report that provides details of the intervention in accordance with ISBE Physical Restraint and Time Out Form Per IAC 1.285 (f)(1).

In the case of imminent danger, I, _____, authorize the faculty of Britten School to utilize physical restraint procedures to ensure the safety of my child and/or others.
